## Technical Sales & AI Professional | Solutions Engineering

Salt Lake City, UT • 801-505-3552 • adamjonlambert@gmail.com • [linkedin.com/in/adamjonlambert](https://www.linkedin.com/in/adamjonlambert)

---

Technical sales and AI professional with experience spanning software development, AI/ML workflows, SaaS operations, and consultative customer service. Experienced translating customer needs and technical issues into practical solutions while collaborating with engineering and business teams. Currently completing a B.S. in Computer Science with hands-on experience in Python, SQL, data pipelines, AI/ML evaluation, technical documentation, and cloud technology coursework.

---

### PROFESSIONAL EXPERIENCE

#### Urban Hill, Salt Lake City — Server & Sales Specialist June 2023 – Present

- Conduct consultative discovery to identify customer needs, preferences, and constraints, translating them into tailored recommendations in a demanding, high-pressure environment.
- Leverage deep product expertise and persuasive communication to guide complex purchasing decisions, consistently driving strong sales and exceptional customer experiences.
- High-performing sales and product-knowledge specialist at a restaurant named a James Beard Award finalist in each of its first three years, contributing to a culture of exceptional service and performance.

#### Truework, Salt Lake City, UT — Operations Specialist October 2020 – May 2022

- Served as a technical liaison between financial partners and internal engineering teams on an income-verification SaaS platform, translating customer issues into actionable technical requirements.
- Used SQL and database queries to diagnose complex customer issues and communicate technical constraints and practical solutions to technical and non-technical stakeholders.
- Identified workflow bottlenecks through customer interactions and operational data and proposed improvements that were adopted company-wide.
- Collaborated cross-functionally to resolve issues in a fast-paced environment while maintaining clear communication with external partners.

#### Banjo, Park City, UT — AI Data Specialist / QA Analyst / AI Product Operations June 2018 – April 2020

- Collaborated cross-functionally at an early-stage AI startup, contributing to dataset preparation, model performance assessment, and QA while partnering with engineers to refine core product capabilities.
  - Built Python data-cleaning and preprocessing pipelines supporting AI/ML model development and evaluation.
  - Demonstrated AI capabilities, internal software tools, and operational dashboards to government officials and other stakeholders, translating technical functionality into practical use cases and business value to support contract acquisition.
  - Evaluated AI-generated outputs at scale, identifying failure modes and quality issues and communicating findings to engineering teams to drive iterative model and product improvements.
- 

### TECHNICAL & AI FLUENCY

- **AI & Data:** AI/ML Model Evaluation, AI QA, Dataset Preprocessing, Python Data Pipelines, AI Training Workflows, LLM/Generative AI Concepts
  - **Solutions Engineering:** Technical Discovery, Consultative Selling, Customer Requirements, Technical Translation, Stakeholder Management, Cross-Functional Collaboration
  - **Development:** Python, Java, C++, C#, JavaScript/HTML/CSS, SQL, Git/GitHub; Algorithms, Databases, Object-Oriented Design
  - **Cloud & Infrastructure:** AWS, Linux/SSH, Networking, Wireshark, MariaDB, Database Systems, Computer Security
  - **Customer Technology:** Zendesk, SaaS Platforms, AI-Enabled Applications, Data-Driven Tools, Technical Documentation
- 

### EDUCATION & TRAINING

University of Utah — Bachelor of Science in Computer Science, *Senior Standing*

University of Utah — Bachelor of Arts in Film and Media Arts *May 2017*
